

Jeopardy v4.0

This version features an updated timer, a setup menu, sounds, and improved graphics. The timer default is 30 seconds. To change it, go to the Setup menu.

First: in order to use this program, you need to enable macros. In Office 2007, it will automatically ask if you want to enable the macros. If you have an earlier version, then use the setup menu to access instructions on how to enable them.

To use this, simply edit the names of the categories to fit what you need, and then enter your questions (and answers) on the appropriate slides.

Once you've entered all the questions, run the show. You must hit the "Start Game" button on this page (it will make sure all the questions appear). Click on the question chosen and that slide will come up. To start the timer, click the block of white squares. They will tick off to show the passage of time. When time is up, a stop sign will appear. Click the stop sign to reload the timer.

To show the answer, click anywhere on the slide other than the timer or the back button. When the question has been answered, click the word "Back" in the lower right hand corner to bring yourself back to the main page. Once there, click the name of the team that got it right and enter the point value of the question. The score will be updated!

Comments? Suggestions?

Email: rmayers@austin.k12.mn.us

P.S. This is, of course, a free program, but if you happen to feel like rewarding hard work with a little money, feel free to PayPal some cash to ryan.mayers@gmail.com.

He's a "police officer" for the Human/G'Dalien Harmony Force

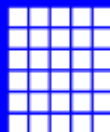

[Back](#)

Future Technology, 300

How do you go to school in the future?

By “head sized cone” transference.

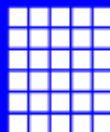

Back

About the Book, 300

Who drew the pictures in Herbert's Wormhole? How do you know that?

Rohitash Rao, from the author's notes.

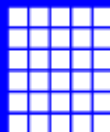

Back

Home, 400

What is Alex's take on the saying "A Promise is a Promise?"

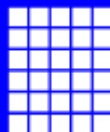

A porcupine is a porcupine too, but people don't go around saying that.

Aliens, 400

How does the museum show the G'daliens helping with the last ice age?

They used a giant hair dryer, attached to their flying saucer, to melt the ice. •

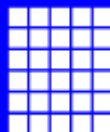

Back

Future Merwinsville 400

What are Girl Scouts called in the future?

Star Scouts.

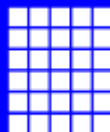

Back

Characters, 400

What is Herbert's last name?

Slewg

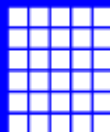

Back

Future Technology, 400

What is the Wormhole (NED) suit designed from?

.

An Alien Slayer 3-D Suit.

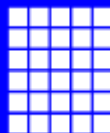

Back

About the Book, 400

Who thinks that the book is
“Absolutely wonderful – fast paced,
inventive...and hilarious?”

J.K. Rowling.

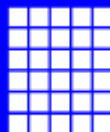

Back

Home, 500

Under what circumstances is it “ok” to enter Herbert’s room (laboratory?)

Name 3.

Explosion, lots of bright light, extreme temperatures, screams of pain, cries of help, or unusually long periods of silence.

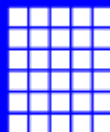

Back

Aliens, 500

Ms. Heather loves the bumper stickers on the G'Dalien flying saucer. Can you remember one?

I brake for Romulans
AAA Amateur Asteroid Association
Moon Base Alpha
I Climbed a Rock on Saturn

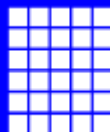

[Back](#)

Future Merwinsville, 500

Name three ways you can travel around Merwinsville in the future.

Anti-Gravitrans, walking, hydrolic chutes, or flying car.

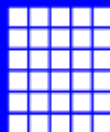

Back

Characters, 500

Is Alex an only child? Elaborate.

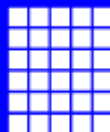

No, he has a 4 year old sister, Ellie.

Future Technology, 500

What is a withdrawal ATM used for in the future?

Withdrawing “access transferable memories”

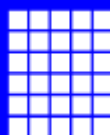

Back

ABOUT THE BOOK, 500

What job did Rohitash Rao's mom wish he had taken instead? Yep, this one is really, really hard.

A Chemist/chemistry (from the dedication page)

Macro Instructions

Daily Double Instructions

Main Menu

Instructions For Adding A Daily Double:

- 1) Use Word Art to create a nice “Daily Double”.
- 2) Copy the word art to whichever slide(s) you want the Daily Double to be on.
- 3) Go to the Animations screen and choose “Custom Animation”.
- 4) Click the Daily Double Word Art to select it and choose “Add Effect”. There should be a great number of entrances to choose from.
- 5) Right click on the element that was just added to the Animation list and drag it to the top of the list. Now right click and choose “Start with Previous”. This will cause the graphic to enter when the slide is shown. Now choose “Effect Options”. The second menu box down should say After Animation. Click the arrow and choose “Hide on Next Mouse Click”. Click Ok.
- 6) Finally, click on the question (just the question) in the main screen. Go back to the custom animation panel and click Add Effect, then find the effect labeled “Appear”. Now, when you go to the slide, you should have an appearing Daily Double graphic which disappears and shows the question the next time the mouse is clicked.

P.S. If you want to add a Daily Double sound effect, then when you go into the “Effect Options” menu to make it disappear after the mouse click, choose a sound to play.

Setup

Instructions For Turning On Macros:

- 1) If you're using Office 2007, then when the PowerPoint opens, there will be a status bar at the top of the screen saying macros have been disabled. There is a button that says "Options". Choose this, and then choose "Enable" and click OK.
- 2) If you are using earlier versions of Office, then it is a little more complicated:
 - A) On the top menu, choose "Tools"
 - B) Choose "Security"
 - C) Choose "Macros"
 - D) You will be given three options (Low, Medium, and High). Choose Medium.
 - E) Click OK, then close PowerPoint completely.
 - F) Restart the program.

Macros should now be enabled. To check , try running the slideshow and clicking the "Start Game" button. If nothing happens, then feel free to email me at rmayers@austin.k12.mn.us, and I will try to help you out.
